

K&B Machine Works, LLC, Announces Opening of 3rd Location

K&B Machine Works, LLC, a company with a 37-year history of service excellence in supporting the oil and gas industry, is announcing the mid-April opening of its third location in Montoursville, Pennsylvania.

The company has two other locations: one in Houma, Louisiana, and another in Houston, Texas.

The Pennsylvania location will support land-based natural gas drilling with state-of-the-art CNC equipment in 31,250 square feet of machining space. The facility will offer tubular accessories and full-length threading. Importantly, K&B is bringing to the area the most extensive list of premium threading licenses to date, enabling service companies as well as production companies to maintain and repair their equipment locally.

“We’re excited about the opportunity to serve this region,” said K&B President Kenneth Wood Jr. “We’ve worked hard to establish our reputation as one of the best machining companies in the business, and the quality of our work and our outstanding safety record bears this out.”

K&B’s Montoursville facility is strategically located within 5 miles of Williamsport, Pennsylvania.
